

## Armed Forces veteran friendly accredited GP practice

We are pleased to have been awarded Veteran Accreditation Status. We record veteran status / member of military family on patient records. All our team have been provided with information on services that provide specific care to veterans.

### **Covid vaccination – Spring boosters**

We will be providing a covid booster to patients aged 75 or over and those who are immunosuppressed. The clinics will be at Broughton Surgery at the end of April and one further clinic in May. We will have a very small clinic at Stockbridge for patients who live within a short distance of the surgery. We will be contacting housebound patients to arrange to vaccinate them at home.

### **Planning application**

We are applying to build a small extension to the Stockbridge Surgery to house our dispensary. This will help the dispensary team to work as efficiently as possible and reduce delays at our reception desk (as medication will be collected direct from the on-site dispensary). We will create an additional consulting room within the surgery as we sometimes do not have room for additional staff who want to see our patients.

### **Travel vaccinations**

This is a reminder that we require a minimum of 8 weeks for travel vaccinations. The 8 weeks begins from when we receive a completed travel health form – the form can be found on our website, [stockbridgesurgery.co.uk](http://stockbridgesurgery.co.uk).
